

Neeraj Narnolia

BACKEND DEVELOPER

Jamtara | 7250823834 | neerajnarn2016@gmail.com

PROFILE SUMMARY

Backend developer specializing in Python and Javascript with hands-on experience building production-grade APIs and web applications. Proven problem-solver with 80+ algorithmic challenges solved. Passionate about server-side programming, and delivering robust, well-tested software with comprehensive observability and error handling.

EDUCATION

- **Class 12th High school – 82 percent** 2021 – 2023
Savitri Devi DAV public School, Jamtara
 - **Relevant Coursework:** Information Practises(IP) in Python pandas and MYSQL
- **Bachelors in Computer Applications – CGPA: 8.2/10** 2023 – 2026
Shree Guru Gobind Singh College, Panjab University, Chandigarh
 - **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Computer Networks, Software engineering

EXPERIENCE

- **SWE intern at Meander Software, Mohali**
 - Assisted in developing and maintaining backend APIs under the guidance of senior developers.
 - Learned to work with REST APIs, databases, and version control tools like Git in a collaborative development environment.
 - Helped debug and test backend features, gaining experience in writing clean and maintainable code.
 - Collaborated with the team to understand backend architecture and software development best practices.

TECHNICAL SKILLS

- **Languages & core:** Python, Javascript, C++
- **Web Development:** HTML, CSS, Tailwind CSS.
- **Backend & Systems:** Django, FastAPI, MYSQL, NODE.js, RESTful APIs
- **Tools & Infrastructure:** Linux, Docker, Git, GitHub, Vercel
- **Specializations:** Database Design, API Development, Systems Programming, Test-Driven Development

PROJECTS

- **T&C Risk Analyzer (Browser Extension + AI/ML Backend)**

[GitHub](#)

Python, FastAPI, Node.js, TypeScript, NLP

- **Backend Development:** Built RESTful APIs using FastAPI and Node.js, handling data processing pipelines, clause segmentation, and integration with a browser extension.
- **Caching & Optimization:** Implemented hash-based caching and change detection using cryptographic

hashing and Redis to avoid redundant processing and improve performance.

- **Data Annotation & ML Exposure:** Created and labeled a dataset of legal clauses and trained a text classification model for risk detection, gaining hands-on experience with NLP pipelines and supervised learning.
- **Collaboration & Tooling:** Worked in a team using Git/GitHub workflows, TypeScript, and modular code practices, coordinating backend–frontend integration and feature development.

• Numerical Methods Solver with MCP

[GitHub](#)

Python, MCP, Groq LLM, uv

- Built a Python-based CLI application using the Model Context Protocol (MCP) to solve quadratic equations through multiple numerical methods.
- Implemented Quadratic Formula algorithms with iteration tracking and descriptive error handling for accurate root computation.
- Integrated Groq LLM to intelligently interpret user queries and recommend or execute the most suitable numerical method through an interactive interface.
- Developed a menu-driven command-line client supporting custom equation inputs, predefined test cases, and AI-powered free-form mathematical queries.
- Strengthened understanding of numerical analysis, MCP architecture, API integration, type annotations, and robust Python application development.

• Social Media App

[GitHub](#)

Django, HTMX, TailwindCSS

- **Full-Stack Development:** Designed and developed a dynamic social media application using Django and HTMX, enabling real-time UI updates without full page reloads, resulting in a seamless and responsive user experience.
- **Frontend Interactivity:** Leveraged HTMX to implement partial page rendering and asynchronous requests, reducing client-side JavaScript complexity while maintaining rich interactivity across core social features.
- **Backend Architecture:** Built RESTful views and Django ORM models to handle user authentication, post management, and feed generation with efficient database querying patterns.

Achievements

- Won Debugging competition in college tech competition by implementing complex Data structures and solving algorithms in C and C++ algorithmic problems
- Solved 150+ Algorithm problems on Leetcode, took part in competitive programming through platforms like Hackerrank, Neetcode and CodeForces.
